(54) DISK RECORDING AND PLAYBACK DEVICE AND DISK RECORDING AND PLAYBACK MEDIUM

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a copy protection system for easily and strongly preventing unauthorized copying without using a complicated ciphering system for a disk recording and playback medium capable of recording and playback.

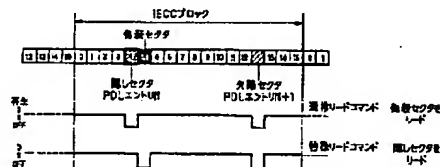

SOLUTION: A disk recording and playback device is provided with a data recording and reproducing means for recording and reproducing data by the unit of 1 ECC block constituted of a plurality of sectors to a data area and forming an alternate sector for the defective sector of the data area in another part excluding the defective sector of the data area, and a defect managing means for managing the number of the defective sectors, the addresses of the defective sectors and the addresses of the alternate sectors in a defect managing area. The defect managing means manages a prescribed normal sector as the defective sector and the recording and reproducing means records normal data in the prescribed normal sector turned to the de-

fective sector and records dummy data different from the normal data and not generating an ECC error in the alternate sector.
